

CS5551 Advanced Software Engineering

Lab Assignment #8

Here we have used two REST which converts number of days into hours, minutes and seconds.

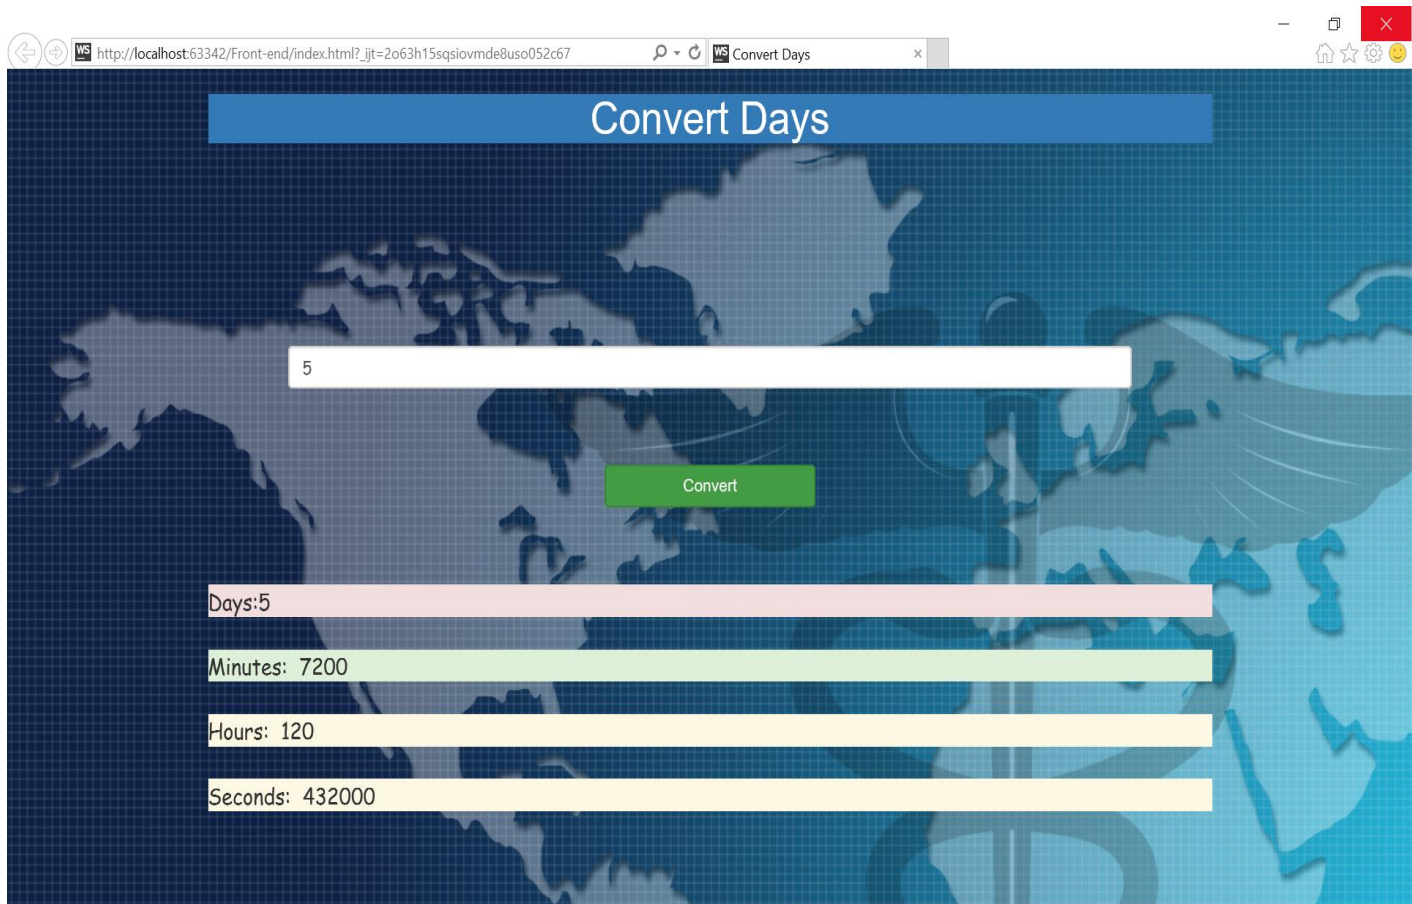

Below screen shots show flow:

JSON output is shown as below:

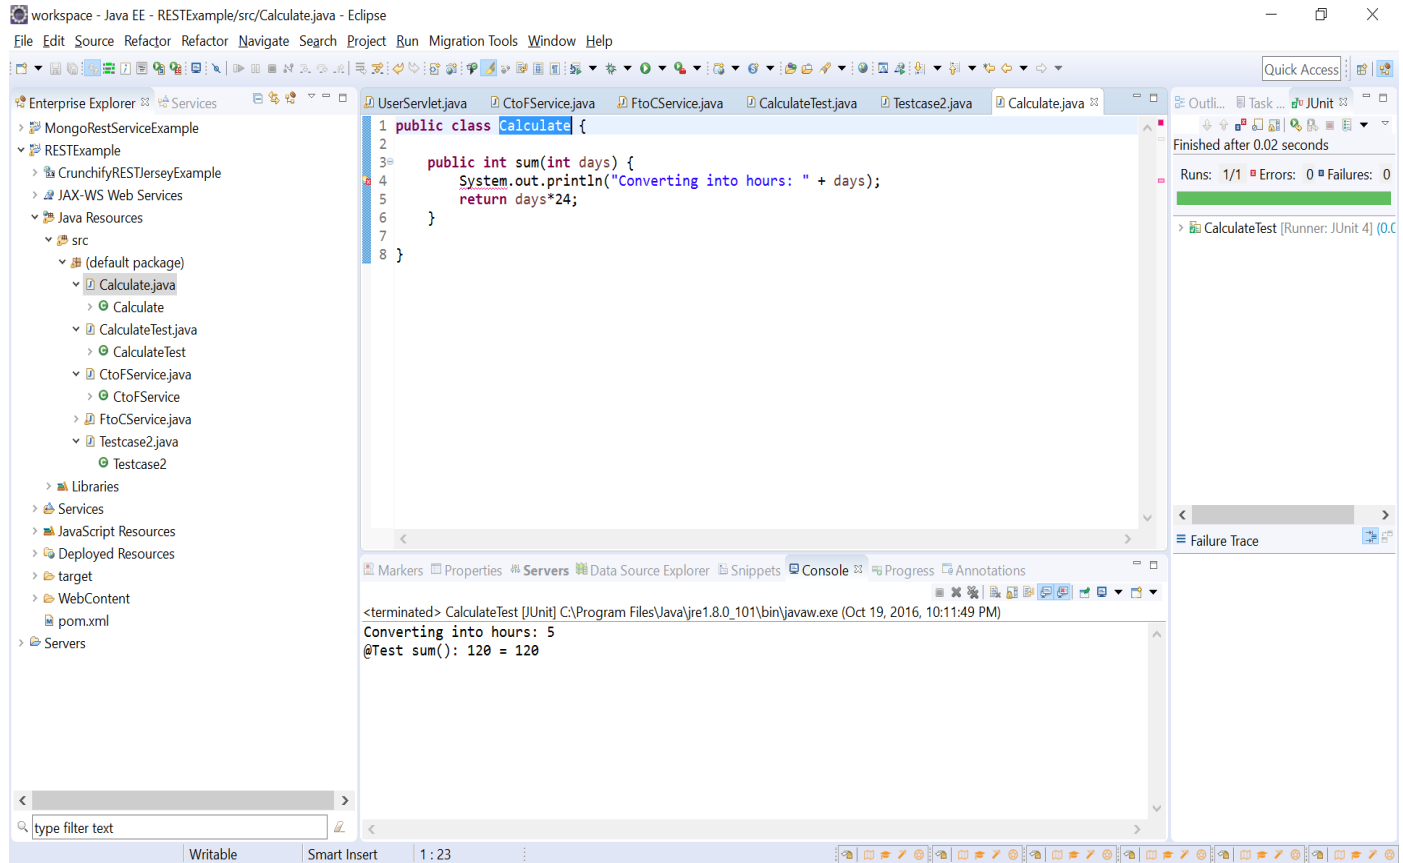

Output, given when number of days is 5:

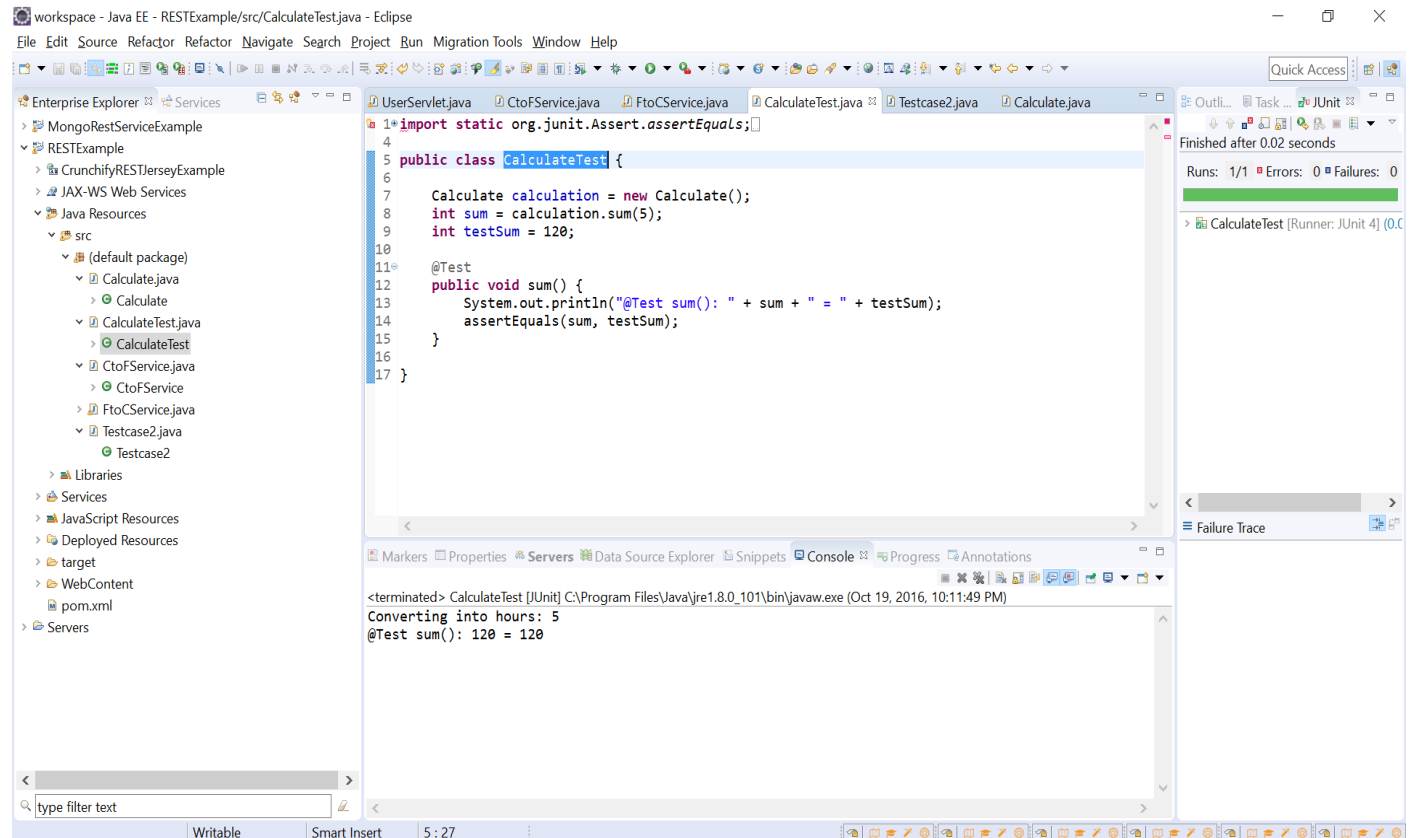

The screenshot shows a web browser window with the title 'Convert Days'. The address bar shows the URL 'http://localhost:63342/Front-end/index.html?_ijt=2o63h15sqsiovmde8uso052c67'. The page has a blue header with the title 'Convert Days'. Below the header is a text input field containing the number '5'. A green 'Convert' button is positioned below the input field. The output is displayed in four horizontal bars: 'Days: 5' (pink bar), 'Minutes: 7200' (green bar), 'Hours: 120' (yellow bar), and 'Seconds: 432000' (yellow bar).

Unit	Value
Days	5
Minutes	7200
Hours	120
Seconds	432000

Here we perform the JUNIT testing, screenshots are shown below:
